

Avni Gupta

Business Technology Analyst | Technology Consulting | Automation & Analytics

India (Open to Pune, Gurgaon, Bangalore, Mumbai, Noida)

📞 +91-9823863228 ✉️ avnigupta.works@gmail.com 🔗 LinkedIn 🐙 GitHub

PROFESSIONAL SUMMARY

Business Technology Analyst with experience delivering **end-to-end technology solutions** across automation, analytics, and enterprise platforms. Proven ability to translate **business requirements into scalable technical designs**, collaborate with client-facing teams, and execute solutions using **Python, SQL, Azure, and Agile delivery practices**. Strong foundation in data-driven decision-making and process optimization.

CORE SKILLS

Programming & Querying: Python, SQL, C++, Java, JavaScript
Databases & RDBMS: MySQL, Relational Database Design, SQL Queries
Cloud & Platforms: Microsoft Azure, Azure App Registration, SharePoint
Data & Analytics: Pandas, Power BI, Advanced Excel, Data Analysis
Automation & Scripting: Python Automation, Excel VBA, Workflow Automation
Web & UI: React.js, Angular, HTML5, CSS3
Delivery Practices: Agile Methodology, SDLC, Unit Testing, QA Validation

PROFESSIONAL EXPERIENCE

Evalueserve, Gurgaon

Business Transformation & Automation Junior Associate (Business Technology Analyst) September 2025 - Present

- Architected and delivered an HR onboarding technology solution by translating business requirements into a 13-step automated workflow using Python, Excel VBA, Microsoft Graph API, and Azure, reducing cycle time from 4 hours to 30 minutes.
- Collaborated with HR stakeholders and internal client teams to design scalable, audit-compliant solutions integrating email automation, calendar scheduling, and SharePoint document management.
- Developed data validation and reporting layers using pandas and xlwings, enabling real-time visibility and improved decision-making accuracy.
- Supported implementation planning, validation testing, and mid-development reviews to ensure timely delivery and quality assurance.

Evalueserve, Gurgaon

Business Transformation & Automation Intern (Technology Consulting Intern) March 2025 - August 2025

- Engineered Python-based analytics scripts using Pandas and PyWin32 to monitor timesheet compliance, identifying 98% of missing or incomplete submissions across 3,000+ employees.
- Operationalized a Tkinter-based data ingestion and email trigger system, applying exclusion rules and workflow automation to streamline client-facing communication.
- Partnered with cross-functional teams to compress a 3-hour manual process to 30 minutes, (~250 hours saved annually)improving compliance outcomes and operational efficiency.

Morgan Stanley, Mumbai

Technology Apprentice July 2024 - January 2025

- Collaborated with cross-functional teams to analyze business problems and implement enterprise-grade technology solutions within an agile delivery model.
- Built a common persistence library using Java, Spring Boot, and JPA, eliminating 30% redundant code and improving database performance.
- Designed and tested Angular-based UI components using Jasmine and Karma, achieving 98%+ test coverage.
- Automated SOLR metadata and alias analysis using Python, enhancing data visibility across 80+ collections.

PROJECTS

Diabetic Retinopathy Detection (Analytics & AI Project)

- Implemented an end-to-end machine learning pipeline covering data preprocessing, class imbalance handling, and model evaluation using TensorFlow and Keras.
- Evaluated multiple deep learning architectures (VGG19, DenseNet201, ResNet50) using balanced datasets.
- Translated analytical findings into actionable healthcare insights, demonstrating the application of analytics and AI to decision-making.

EDUCATION

B.Tech in Computer Science & Engineering (Data Science)

Bennett University, Greater Noida

CGPA: 9.01

September 2021 - May 2025

PUBLICATIONS & ACHIEVEMENTS

- Scopus-indexed publication: *Enhancing Liver Cirrhosis Diagnosis – Comparative Analysis of XGBoost, SVM, and Random Forest*; presented at an international conference (75+ researchers).
- Dean's List Award: SGPA 9.68 (Top academic performer).
- Star Collaboration Recognition at Evaluateserve for delivering process optimization initiatives.
